United States to Levy Countervailing Duties Against Vietnam

Dear Valued U.S. Import Customer,

On November 4, 2020, the Department of Commerce announced the preliminary affirmative determination of countervailing duties (CVD) against Vietnam for passenger vehicle and light truck tires. Commerce's determination also states that Vietnam's undervalued currency was one of the subsidies that is being offset in the CVD case. This is the first time the United States has ever made an affirmative CVD determination for undervalued foreign currency.

Final determinations on the CVD case will not be made until March or April 2021, pending any extension to the deadline by Commerce or the US International Trade Commission (ITC). Until then, CVD duties will be applied at the preliminary CVD rates between 6.23 percent and 10.08 percent depending on the exporters and producers.
